Maya Chen

JUNIOR SOFTWARE ENGINEER

Austin, TX | +1 (202) 555-0147 | maya.chen.sample@example.com
linkedin.com/in/maya-chen-sample | github.com/mayachen-sample

PROFESSIONAL SUMMARY

Early-career software engineer with internship and project experience building Java and React applications. Interested in reliable APIs, accessible interfaces, and maintainable software. Comfortable collaborating through code review and iterative delivery.

SKILLS

Java, Spring Boot, JavaScript, React, SQL, MySQL, REST APIs, Docker, Git, JUnit, HTML, CSS

EXPERIENCE

Software Engineering Intern | Northstar Labs (fictional) | Austin, TX

May 2025 - Aug 2025

- Implemented 6 REST endpoints in a Spring Boot service and added validation for common malformed requests.
- Created reusable React form components and resolved 14 accessibility and usability issues from QA feedback.
- Added JUnit coverage for account and catalog flows; documented local setup for a 4-person team.

SELECTED PROJECTS

Campus Events Portal | Java, Spring Boot, React, MySQL

Built event search and RSVP workflows for a course project; designed a normalized schema for events, users, and registrations. Added input validation and API error states.

Reading List API | Spring Boot, JUnit, Docker

Created a CRUD API with pagination and integration tests; packaged the service in a Docker image for repeatable local runs.

EDUCATION

B.S. Computer Science | Hillview University (fictional), Austin, TX | May 2026 | GPA: 3.6/4.0

CERTIFICATIONS

Oracle Java Foundations Associate (sample credential) | GitHub Foundations (sample credential)
